Email: rinishagedam@gmail.com

Backend engineer with 5+ years of experience building reliable microservices and LLM-driven features that improve customer containment and operational efficiency at scale. Skilled in Python, microservices, databases, and data-driven optimisation.

EXPERIENCE

American Express

September 2024 - Present

Software Engineer II

- FAQ AI Agent:** Built an LLM + RAG pipeline with Postgres vector search, curated the vector store, and launched in the UK market, assisting an average of 60k monthly customers with a 70% bot containment rate.
- Multi-Bubble Capability across AskAmex Chatbots:** Enabled multi-bubble messaging by upgrading core architecture and design, driving adoption across 5 AI agents and 20+ bots, achieving zero post-release issues and improved message readability.
- Retention AI Agent:** Validated technical feasibility for LLM-enabled retention journeys by exploring authentication, cancellation APIs, and integration paths, achieving ~80% product-requirement alignment.
- Transaction AI Agent:** Improved bot containment rate by 8–10% by analysing user chats with the product team and implementing enhancements that elevated customer experience.
- Mentored a new hire** through side-by-side knowledge transfers, enabling them to start contributing code within 2–4 weeks.

Tata Consultancy Services

November 2020 - September 2024

Systems Engineer

- Built a Python library tracking module/class/method usage, producing 7B+ data points over 3 years.
- Automated aggregations via Jenkins and delivered usage/unused code reports; led 2 junior engineers to remove legacy code, reducing codebase size by 37%.
- Dockerized the system, cutting deployment time by 30%.
- Decomposed a monolithic library into 15+ maintainable modules, leading the analysis and implementation phases.

Persistent Systems

June 2019 - December 2019

Software Engineering Intern

Developed low-latency REST APIs in Flask (Model-View-Controller architecture) backed by MySQL.

EDUCATION

Indian Institute of Information Technology, Nagpur

June 2016 - June 2020

B.Tech, Computer Science and Engineering

CGPA: 7.74/10

Relevant coursework: Data Structure, Object-Oriented Programming, Database Management, Distributed Systems

SKILLS

Languages:	Python (Proficient); C++, Java (working knowledge)
Backend & Frameworks:	Flask, REST APIs; microservices
Cloud & DevOps:	Docker, Jenkins CI/CD; AWS (EC2, S3, RDS, DynamoDB)
Databases:	MySQL, MongoDB, InfluxDB, Postgres
Monitoring & Observability:	Grafana, InfluxQL
Testing & Quality:	Pytest, debugging, root-cause analysis
Version Control:	Git
Certification:	AWS Certified Solutions Architect - Associate
